Summary

Full-Stack Engineer with 3 years of production experience across Colombia, Mexico, and Brazil. Specialized in Next.js, TypeScript, and Node.js, with hands-on AI/LLM integrations using OpenRouter and multi-tenant Postgres. Delivered a payments refactor with +20% throughput and integrated critical government systems (Colombia Ministry of Transport, Bogotá Mobility Secretariat). Comfortable owning features end-to-end in async remote teams.

Experience

Carryt Medellín, Colombia
Full-Stack Engineer May 2024 - Present | Full-time, Remote

- Proposed and led refactor of the payment settlement module: +20% throughput, eliminated recurring weekly production errors, now live in 3 countries.
- Built RNDC module: mandatory integration with Colombia's Ministry of Transport (non-compliance penalties up to 20 SMMLV).
- Implemented market-specific financial logic for Colombia and Mexico with per-country calculation rules.
- Set up production error monitoring with Sentry (frontend + backend) and Jest-based testing across critical paths.
- Currently building admin panel for the Bogotá Mobility Secretariat.

Stack: Next.js, TypeScript, Node.js, PostgreSQL, Docker, REST APIs, Sentry, Jest.
